Date:

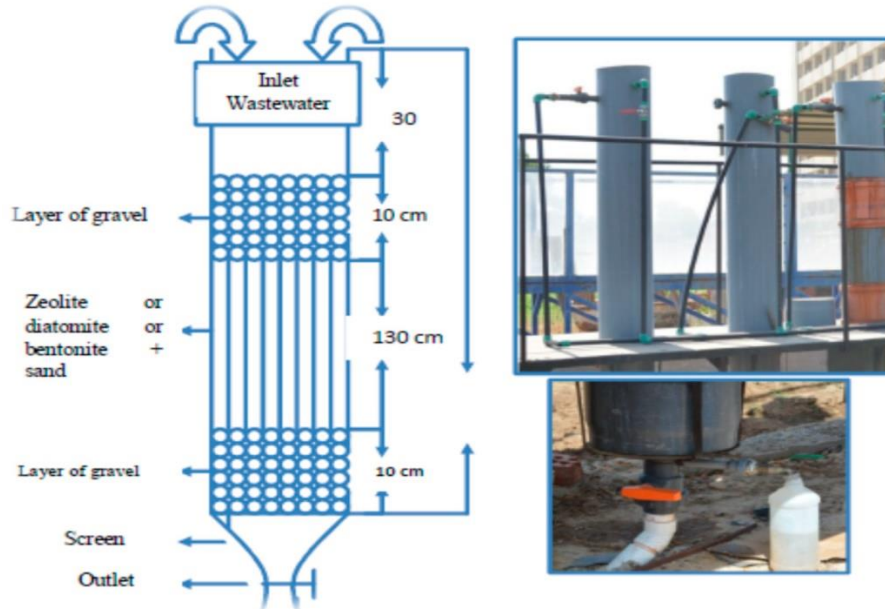

Gravity Filtration Unit

Product Description: -

A lab-scale gravity filtration unit is a simple and versatile setup for separating solid particles from a liquid using gravity as the driving force.

Benefits of Lab-Scale Gravity Filtration:

- Simple and inexpensive setup.
- Easy to operate.
- Suitable for small volume filtrations.
- Wide range of filter media options for different types of particles.

Lab Scale Gravity Filtration Unit

Technical Specifications

Sl. No.	Technical Specification
1	10 L GF Unit with 4 Types of Bed Arrangement with natural materials like stone, sand, etc./better
2	Arrangement of Backwashing
3	Flow Meter with a suitable range
4	I/O Connection
