

Ref.No. /2024-25

Date:

## Solar Panel with Battery Unit

### Product Description: -

A solar panel and battery system can be a powerful combination for providing clean and reliable energy. Solar panels consist of photovoltaic (PV) cells that capture sunlight and convert it into direct current (DC) electricity through a process called the photovoltaic effect. Batteries store the surplus DC electricity produced by the solar panels during peak sunlight hours. This allows you to use the stored energy later in the day, at night, or during cloudy periods.

## Solar Panel with Battery Unit

### Technical Specifications

Sl. No.	Technical Specification
1	Solar Panels (2*2 ft.)
2	Batteries
3	Power Converter
